## Welcome Message from the Chairpersons

Dear Attendees,

Similar to 2020, it is unfortunate that we were forced to run our conference virtually, yet again. As you can imagine, the original plan was to host you all in Neuchâtel, Switzerland, to both enjoy both the scientific sessions, as well as, the social events together at the **16th edition of IEEE International Symposium on Medical Measurements and Applications, IEEE MeMeA 2021!**

Anyway, we are going to run the symposium at best, enjoying two great keynotes, two great tutorials, and a great scientific program that will develop through a series of very interesting talks as provided by you, the authors of the papers, presented at the Regular Sessions, as well as, four top-interesting Special Sessions.

Please, let me grant a great thanks to all the people that have worked hard to organize such an amazing program: **Catherine Dehollain**, **Sabrina Grassini**, **Paola Saccomandi**, **Lorenzo Scalise**, and **Emiliano Schena**. Special thanks go to **Taylor Lineberger** for taking care of a very long series of issues that have enabled all details going into the right place for this conference. Of course, I also thank **Marco Parvis** and **Pasquale Daponte**, who have always supported me along the pathway. So, many thanks from the very bottom of my heart to all of these special persons: the conference exists this year because of them!

Since we are going to run the symposium virtually from Neuchâtel and surrounding regions, we try our best to host you and, therefore, we thought to also organize and offer you a virtual tour from **Neuchâtel** to the surrounding regions. We will move from Neuchâtel to fly into **Lausanne**, town of the main campus of EPFL (<https://www.epfl.ch/en/>) and site of the International Olympic Committee (<https://olympics.com/>), then to **Vevey**, a well representative town of the Lavaux' region (<https://www.region-du-leman.ch/en/Z9278/lavaux-unesco-terraced-vineyards>), finally to **Montreux**, town of the very famous Montreux Jazz Festival (<https://www.montreuxjazzfestival.com/en/>), before moving back to Neuchâtel by through **Gruyères**: the town of one of the most famous cheese in the world, and of a famous artist that gave the birth to the most famous science-fiction extraterrestrial-specie from Hollywood.

You will also receive a special gift from our conference realized in purpose for you, and inspired to this Swiss artist.

Please, enjoy our region and our symposium, even though only virtually, with joy in your heart to be part of a great community that is deeply contributing to the best of Measurement and Instrumentation for Applications to medical field!
